Professional Summary

Full Stack Web Developer with 4+ years of hands-on experience in web development, including 2+ years of professional experience developing and maintaining government. Experienced with Laravel, Vue.js, Quasar Framework, TypeScript, and relational databases, with a focus on building frontend and backend functionality, REST APIs, database-driven systems, and application modules based on business requirements.

Professional experience includes working on government applications for asset and inventory management, geographic visualization, and educational management systems. Also experienced in building personal web and mobile projects using Vue.js, Laravel, React, and React Native.

Professional Experience

Full Stack Web Developer

INFOTEC – Dirección General de Tecnologías de la Información y Digitalización (SRE)

| February 2024 – July 2026

- developing and maintaining government web applications using Laravel, Vue.js, Quasar Framework, JavaScript, TypeScript, and relational databases.

Selected Projects & Responsibilities

Asset & Inventory Management Application

- Developed and maintained frontend functionality using Vue.js and Quasar Framework, as well as backend functionality using Laravel.
- Contributed to an inventory management application used to register and manage the organization's real estate assets, buildings, facilities, and personnel information.
- Developed a Movement Log (Bitácora de Movimientos) module to track user activity throughout the application, including login events and the creation, modification, updating, and deletion of real estate records.
- Implemented activity tracking for operational processes such as physical inventories and asset surveys, providing traceability of user actions within the system.
- Implemented QR-based asset identification to support the registration and management of physical assets.

GEORELEX

- Contributed to the development and maintenance of GEORELEX, a geographic visualization application used to provide a geographic view of passport and consular office operations.
- Developed the country and flag catalog module, integrating the required data into the application's geographic visualization functionality.

IMR Educational Management Application

- Developed backend functionality using Laravel for an educational management application.

- Implemented automated generation of Excel documents from database information using a Laravel Excel library.
- Developed functionality to generate academic documents and reports, including student report cards and general grade averages, based on information stored in the application's database.

Technical Skills

- Languages: PHP, JavaScript, TypeScript, HTML5, CSS3
- Frontend: Vue.js, Quasar Framework, React, Vue Router, Pinia, Zustand, Tailwind CSS, Astro
- Backend: Laravel, REST APIs, Laravel Sanctum, Laravel Passport, WebSockets
- Mobile: React Native, Expo
- Databases: PostgreSQL, MySQL
- Tools & Platforms: Git, GitHub, Postman

Selected Projects

My Social Network

Laravel | Vue 3 | TypeScript | PostgreSQL | Pinia | Laravel Reverb | AWS S3

- Developed a full-stack social networking application using a **Laravel REST API** and **Vue 3** frontend.
- Implemented authentication, user profiles, posts, comments, reactions, and notifications.
- Implemented real-time functionality using **Laravel Reverb** and **WebSockets**.
- Integrated PostgreSQL for application data and cloud storage for user and post media.

My Workout App

React Native | Expo | TypeScript | Laravel | PostgreSQL

- Developing a cross-platform mobile application for workout and routine management.
- Built the mobile application using React Native and Expo.
- Developed a Laravel API for authentication, workout plans, exercises, and workout sessions.
- Implemented database-driven workout planning and exercise management.

Lili Coffee

Astro | Vue.js | Tailwind CSS

- Developed a responsive website for a local coffee and frappé business.
- Implemented the frontend using Astro, Vue.js, and Tailwind CSS.
- Focused on responsive design and presentation of products and business information.

Education

Computer Systems Engineering | Instituto Tecnológico de Matamoros
